Summary

Full Stack Web Development Student seeking a junior web developer position to use my attention to detail and leadership skills to expand and grow utilizing the web skills I acquired during my training.

Technical Skills

Languages: HTML, Handlebars, CSS, Bootstrap, Javascript, jQuery, Git, Markdown, Node, Express, mySQL, API Consumption.

Aplications: VS Code, Github, Heroku.

Projects

Weather Site | https://github.com/hockeyduck3/Weather-Site | https://hockeyduck3.github.io/Weather-Site/

For this project I made a simple Weather Site using the OpenWeather api. You can search for a city name or zip code to find local weather about that area.

Languages: HTML, CSS, Bootstrap, jQuery.

Poke-Build | https://github.com/Akessler314/DREAM-TEAM | https://poke-build.herokuapp.com/

This was my second group project in my Full Stack Web course. My team and I wanted to not only push ourselves but make something that was really fun!

My role on this project was handling the Frontend UI, Javascript, and assisting on the Backend side when needed.

Languages: Handlebars, CSS, Bootstrap, jQuery, Node, Express, and Sequelize.

Eat-Dat-Burger | https://github.com/hockeyduck3/Eat-Dat-Burger
| https://eat-dat-burger-website.herokuapp.com/

This project is a simple burger eating website I made to show off how a mySQL server could be used. Type in the name of a burger and it will show up on the left side, click on the burger name then it will show up on the right.

Languages: Handlebars, CSS, Bootstrap, jQuery, Node js, Express, mySQL.

Experience

Volunteer Sound and Visual Technician   Sept 2019 – Present

The Rising Church
South Jordan, UT
Engineers audio and creates visuals using OBS, ProPresenter and Apple iMac Computer. Provides sound mixing with an Allen and Heath SQ5 and Enlighten for lighting. Conducts pre and live video productions for the church website.

Key Accomplishments:
- Given lead role in first year
- Trains and coaches new volunteers

Volunteer Sound and Visual Technician   June 2012 – Feb 2019

Crosspoint Church
Salt Lake City, UT
Engineered audio and created visual effects and design using a Yamaha QL5 soundboard, ProPresenter, Photoshop, Adobe Premiere Pro, and Proclaim.

Key Accomplishments:
- Designed and prepared marketing, media, advertisement graphics for the church's bulletins, in-service announcements and website.
- After 3 years I was recognized as a leader at age 17 and began training new members.

Education

Bootcamp Certificate: University of Utah, Salt Lake City, UT (In Progress)

Professional Development: Broadview University, Salt Lake City, UT (Basic Web Design, Intro to Photoshop, Intro to Film, Digital Film Editing, Intro to Game Development).
